SUMMARY

Economics (Data Analytics) and Cognitive Science student with technology consulting experience in cloud ERP implementation (Oracle NetSuite), client needs assessment, and data-driven strategy.

EDUCATION

University of Toronto | Toronto, ON

Expected April 2027

Honors Bachelor of Arts and Sciences — Economics (Data Analytics); Cognitive Science

Relevant Coursework: Econometrics (IV/2SLS, RDD, difference-in-differences, synthetic control); Big Data tools for Economists

EXPERIENCE

Freelance Data Consulting | *Co-Founder* | Washington, DC

May 2025 – Present

- Co-founded a consulting firm turning small businesses' unused data into statistical pricing, revenue, and expansion strategies.
- Advised clients across many sectors, auditing each client's existing data to identify gaps and opportunities, then delivering tailored recommendations.
- Built client analyses in Python on recurring tight deadlines across concurrent engagements.

One Pacific | *Technology Consulting* | Hong Kong SAR

May 2025 – July 2025

- Partnered with a consulting team to assess business needs for international clients and implement Oracle NetSuite cloud ERP.
- Analyzed market data with a cross-functional team to identify underserved expansion markets in Hong Kong and Asia-Pacific.

PROJECTS & RESEARCH

Can Prediction Markets Out-Forecast the National Weather Service? | *Independent Research (Python)*

- Built an end-to-end Python data pipeline combining Kalshi prediction-market prices with NWS National Blend of Models forecasts for NYC daily highs (129 event-days, 774 markets per forecast horizon); validated with a 16-test automated suite.
- Evaluated accuracy with Brier skill scores, Murphy decomposition, Mincer-Zarnowitz regressions, and block-bootstrap CIs; preliminary results show a ~15% lower day-ahead Brier score for markets than for the NWS benchmark.

Community Violence Intervention and Baltimore Homicide Rates | *Research*

- Estimated the effect of Baltimore's Community Violence Intervention strategy on homicide rates in Python; presented findings at the 6th Annual Tech Econference.

LEADERSHIP & ACTIVITIES

The Invisible Hand, UofT Undergraduate Economics Research Journal | *Co-Founder & Director*

March 2026 – Present

- Co-founded the first undergraduate economics research journal at U of T St. George: drafted its constitution, recruited a faculty advisory council of 7 professors, and hired 5 editors and staff.
- Designed and ran the submission-to-publication workflow (sourcing, editing, and unbiased selection of papers) while leading editors; promoted the journal across economics classes, generating submissions.

Vertige Investment Group | *Macroeconomic Research* | Toronto, ON

January 2025 – September 2025

- Produced macroeconomic and investment-strategy reports under tight deadlines, collaborating with cross-functional teams on market research, financial modeling, risk assessment, and due diligence to identify regional investment opportunities.

University of Toronto Economics Club | *Research Committee Member* | Toronto, ON

August 2025 – Present

- Wrote research pieces on behavioral economics, pricing strategy, justice reform, and policy design, combining literature reviews with data analysis.

SKILLS

Programming & Data: Python, SQL, R, Stata, JavaScript, HTML/CSS, Flask, GitHub; Microsoft Excel, PowerPoint, Word, Teams

Enterprise, Cloud & AI: Oracle NetSuite (cloud ERP), Render (cloud deployment), generative AI tools (e.g., Claude) for coding and research.

Analytics & Business: Statistical modeling, causal inference, forecasting, market research, needs assessment

Interests: Bridge, scuba diving, backpacking, guitar, fishing, live music
